 <https://ronitshrivastav.vercel.app>

Innovative developer with hands-on experience building complete applications across mobile, web, and desktop using Flutter, Firebase, and .NET. Not just comfortable with Dart — you've shipped real products: a Microsoft Store-published desktop app, full AI-powered education platforms, and business management systems used by real clients. You focus on clean architecture, responsive design, and reliable performance. You work fast, learn aggressively, and take ownership of features from idea to deployment. Always pushing for better solutions, better UI, and better execution — and capable of contributing immediately to any serious project.

EXPERIENCE

Flutter Developer

Birgunj

Agram Infotech

May, 2021 - Nov, 2024

- Built major features for a production chat app and an e-learning platform using Flutter & Dart.
- Developed clean, reusable UI components and optimized navigation flows across the apps.
- Implemented Firebase Authentication, Firestore messaging, Cloud Storage, and push notifications.
- Fixed UI/logic bugs, improved app performance, and reduced load times.
- Collaborated with backend and design teams to deliver features within tight timelines.
- Integrated REST APIs with Dio/HTTP and handled JSON parsing efficiently.
- Wrote maintainable, modular code and improved overall code quality across the project.

Senior Flutter Developer

Lalitpur, Kandepta

NepaTronix Engineering Solution PVT. LTD.

Dec, 2024 - Present

- Built and shipped production-grade Flutter applications for both Android and iOS platforms.
- Event Solution (Play Store): Developed a full-featured multi-role event ticketing app with role-based access control (RBAC) supporting Admin, Employee, and User roles; implemented secure authentication, stall booking, event joining, hold stall, and a seamless checkout flow
- Innovator – Social Media (Play Store): Built a social feed with post creation, likes, reels comments, and AI-based content recommendations; implemented real-time messaging using WebSockets.
- Innovator – E-Learning (Play Store): Developed structured course modules with lesson playback, payment integration and enrollment ows integrated into the Innovator platform.
- Innovator – E-Commerce (Play Store): Implemented an electronics storefront with product listings, cart, and secure payment gateway integration and COD for end-to-end purchase flows.
- Innovator – KMS (Knowledge Management System, Play Store): Developed a school-focused module inside Innovator with multiple roles — teachers can view their salary, manage class activities, and mark student attendance; students can view their own attendance records and academic progress. Schools can track the teachers activity and attendance.
- Dating App (In Progress – Personal Project): Independently designing and building a dating application with profile matching, swipe UI, and real-time chat; currently in active development.
- Integrated Google Maps SDK, Firebase Cloud Messaging (FCM) push notications, and Bluetooth thermal printer communication across multiple apps.

EDUCATION

Bachelor in Computer Science and Information Technology

Birgunj

National Infotech College

Apr, 2022 - Present

I'm currently pursuing my Bachelor's in Computer Science and Information Technology at National Infotech College. The program has given me a solid foundation in software engineering, algorithms, databases, networking, and system architecture. What sets my academic journey apart is that I've applied everything directly to real projects. While studying, I've built complete production-level applications using Flutter, Firebase, and .NET — including AI-powered educational platforms, business management software, and cross-platform apps deployed on mobile and Windows. My coursework has strengthened my problem-solving mindset, while my projects have given me the practical experience to design, build, and ship real products.

PROJECTS

Event Solution

- Developed an event ticket booking app with multi-tier authorization for different user roles (e.g., Admin, User, Employee).
- Integrated user authentication and role-based access control (RBAC) for seamless permissions management.).
- Built a responsive UI/UX using Flutter, ensuring smooth functionality across mobile platforms (iOS/Android).
- Deployed and tested the app, ensuring optimal performance and user experience.

https://play.google.com/store/apps/details?id=com.nepatronix.eventsolutions&pcampaignid=web_share

MBT

- Developed a mobile app for generating and printing barcodes and QR codes using Bluetooth-enabled thermal printers.
- Integrated barcode and QR code generation functionality, allowing users to create custom codes for various use cases (e.g., product labels, qr code).
- Enabled seamless Bluetooth connectivity to connect the app with thermal printers, facilitating direct printing of generated codes.
- Developed a feature to allow users to select different label formats (e.g., size, layout) for printing, optimizing for various printing needs.
- Ensured real-time printing with Bluetooth communication, focusing on high reliability and ease of use for the end user.
- Implemented an intuitive UI/UX for smooth user interaction with the barcode/QR code creation process and printing settings.

https://play.google.com/store/apps/details?id=com.mbt.barcode_label_designer&pcampaignid=web_share

PDS-330

- Built PDS-330 as a high-efficiency document scanning app optimized for fast PDF creation.
- Designed a clean, minimal UI for quick scanning, organizing, renaming, and sharing documents.
- Implemented secure local storage to ensure scanned files stay on the user's device unless manually exported.
- Developed a stable, low-latency processing pipeline for generating high-quality PDFs from connected scanner devices.
- Managed the entire lifecycle — development, deployment, Play Store release, updates, and user support.

Innovator Social Media — Founder & Lead Developer (Flutter / .NET / AI Integration)

- Social feed with post creation, likes, comments, follow system, and AI-based recommendation integration
- Real-time messaging via WebSockets; push notifications via Firebase Cloud Messaging (FCM)

Tech: Flutter · Dart · RiverPod · WebSocket · FCM · REST API

https://play.google.com/store/apps/details?id=com.innovation.innovator&pcampaignid=web_share

Innovator E-Learning — Founder & Lead Developer (Flutter / .NET / AI Integration)

- Structured course and lesson modules with video playback, progress tracking, and enrollment management
- Modular architecture allowing independent feature scaling within the Innovator platform

Tech: Flutter · Dart · RiverPod · Khalti · REST API · FCM

https://play.google.com/store/apps/details?id=com.innovation.innovator&pcampaignid=web_share

Innovator E-Commerce — Founder & Lead Developer (Flutter / .NET / AI Integration)

- Electronics storefront with product listings, cart, order management, and payment gateway integration
- Integrated Khalti for secure in-app payment processing

Tech: Flutter · Dart · RiverPod · Khalti · REST API

https://play.google.com/store/apps/details?id=com.innovation.innovator&pcampaignid=web_share

Innovator KMS — Founder & Lead Developer (Flutter / .NET / AI Integration)

- School-focused module inside Innovator with dedicated role-based views for teachers and students
- Student role: view personal attendance records, academic progress, and announcements
- Teacher role: view salary, manage class schedules, mark and review student attendance

Tech: Flutter · Dart · RiverPod · REST API · Role-Based Views · FCM

https://play.google.com/store/apps/details?id=com.innovation.innovator&pcampaignid=web_share

ACHIEVEMENTS

SKILLS

Dart, Flutter, RiverPod, GetX, Clean Code Structure, Responsive Design, Google Map integration, rebase, app deployment, Integrating APIs, Payment Gateway Integration, Git/GitHub, Android App Deployment, IOS App Deployment, Windows App Deployment

LANGUAGE

English, Nepali, Hindi, Bhojpuri
